----------	------	------------	-------	------	-------	------	-------------

01 Device Receiving & Asset Processing

<ul style="list-style-type: none"> Serial number captured for every device at point of collection 	<ul style="list-style-type: none"> Asset tag scanned and matched to client manifest
<ul style="list-style-type: none"> Device condition recorded at receiving dock 	<ul style="list-style-type: none"> Timestamp logged for every device received
<ul style="list-style-type: none"> Client collection details recorded (date, location, contact) 	<ul style="list-style-type: none"> ERP/ITAM record created for every received device
<ul style="list-style-type: none"> Discrepancies between manifest and physical devices flagged 	<ul style="list-style-type: none"> IP camera scan verified over conveyor at receiving stage

02 Asset Grading & Quality Inspection

<ul style="list-style-type: none"> Condition grade assigned (A/B/C/D) for every device 	<ul style="list-style-type: none"> Photographic evidence captured per device
<ul style="list-style-type: none"> Device specifications recorded (model, RAM, storage type) 	<ul style="list-style-type: none"> HDD/SSD/NVMe labels scanned and linked to parent device
<ul style="list-style-type: none"> Loose drives logged and linked to source device 	<ul style="list-style-type: none"> Grading records synced to ITAM system
<ul style="list-style-type: none"> Mixed device types assessed under consistent grading workflow 	<ul style="list-style-type: none"> Asset recovery value estimated per graded device

03 Data Sanitization & Destruction Compliance

<ul style="list-style-type: none"> Data sanitization method confirmed per device (NIST 800-88) 	<ul style="list-style-type: none"> Sanitization process timestamped per device
<ul style="list-style-type: none"> Operator name and ID recorded for every destruction event 	<ul style="list-style-type: none"> Tamper-proof Certificate of Erasure generated per device
<ul style="list-style-type: none"> NAID AAA compliance verified 	<ul style="list-style-type: none"> R2v3 / e-Stewards / ADISA requirements met
<ul style="list-style-type: none"> GDPR / HIPAA data destruction obligations documented 	<ul style="list-style-type: none"> Certificate of Destruction (COD) issued to client

0
4

Remarketing, Refurbishing & Resale

■ Verified device specs carried forward from grading stage	■ Condition grade confirmed before listing
■ Serial number verified against destruction records	■ Resale platform populated with verified asset data
■ Asset recovery value calculated per device	■ Client report generated with full device history
■ No re-auditing required — data captured at processing stage	■ Time-to-list tracked per device batch

0
5

Responsible Recycling & e-Waste Disposal

■ Devices confirmed non-resaleable before routing to recycling	■ WEEE Directive compliance verified per device
■ ISO 14001 environmental disposal requirements met	■ Zero landfill policy documented per batch
■ e-Waste disposal vendor verified and recorded	■ ESG impact report generated
■ Loose drives and removable media logged before disposal	■ Environmental disposal certificate issued

0
6

Final Disposition & Client Reporting

■ Full chain-of-custody report generated per client	■ Every device accounted for from receiving to final disposition
■ Certificate of Destruction delivered to client	■ Audit trail complete and accessible
■ No ghost assets remaining in system	■ Client sign-off obtained on final disposition report
■ Multi-site reconciliation completed if applicable	■ Records archived and accessible for future audits

This checklist covers the minimum chain-of-custody requirements for ITAD processing facilities operating under R2v3, NAID AAA, ADISA, GDPR, and HIPAA compliance frameworks. Scanflow automates capture and documentation across every checkpoint in this checklist.
