

AI VISUAL INTELLIGENCE PLATFORM

VISUAL INTELLIGENCE FOR MANUFACTURING

Automated visual inspection and asset identification,
built for the lines you already run.

Scanflow is an AI Visual Intelligence platform **built for manufacturing.**

Scanflow brings automated visual inspection and asset identification to manufacturing lines catching what manual checks miss, in real time.

From casting and fastener QC to VIN scanning, ITAD, solar, and tire asset identification, Scanflow fits into the inspection stations you already run no heavy hardware overhaul required.

24/7

Inspection coverage, every shift

100

Defects tracked, zero paperwork

01

Platform for visual inspection
& asset traceability

Visual Inspection full quality control, live.

Automated defect detection on real components, running live on screen catching cracks, misalignments, and surface flaws the moment they happen. Three capabilities come built in:

WHAT'S INCLUDED

QC Agent

Ask questions about your inspection data in plain language instant answers, no dashboards.

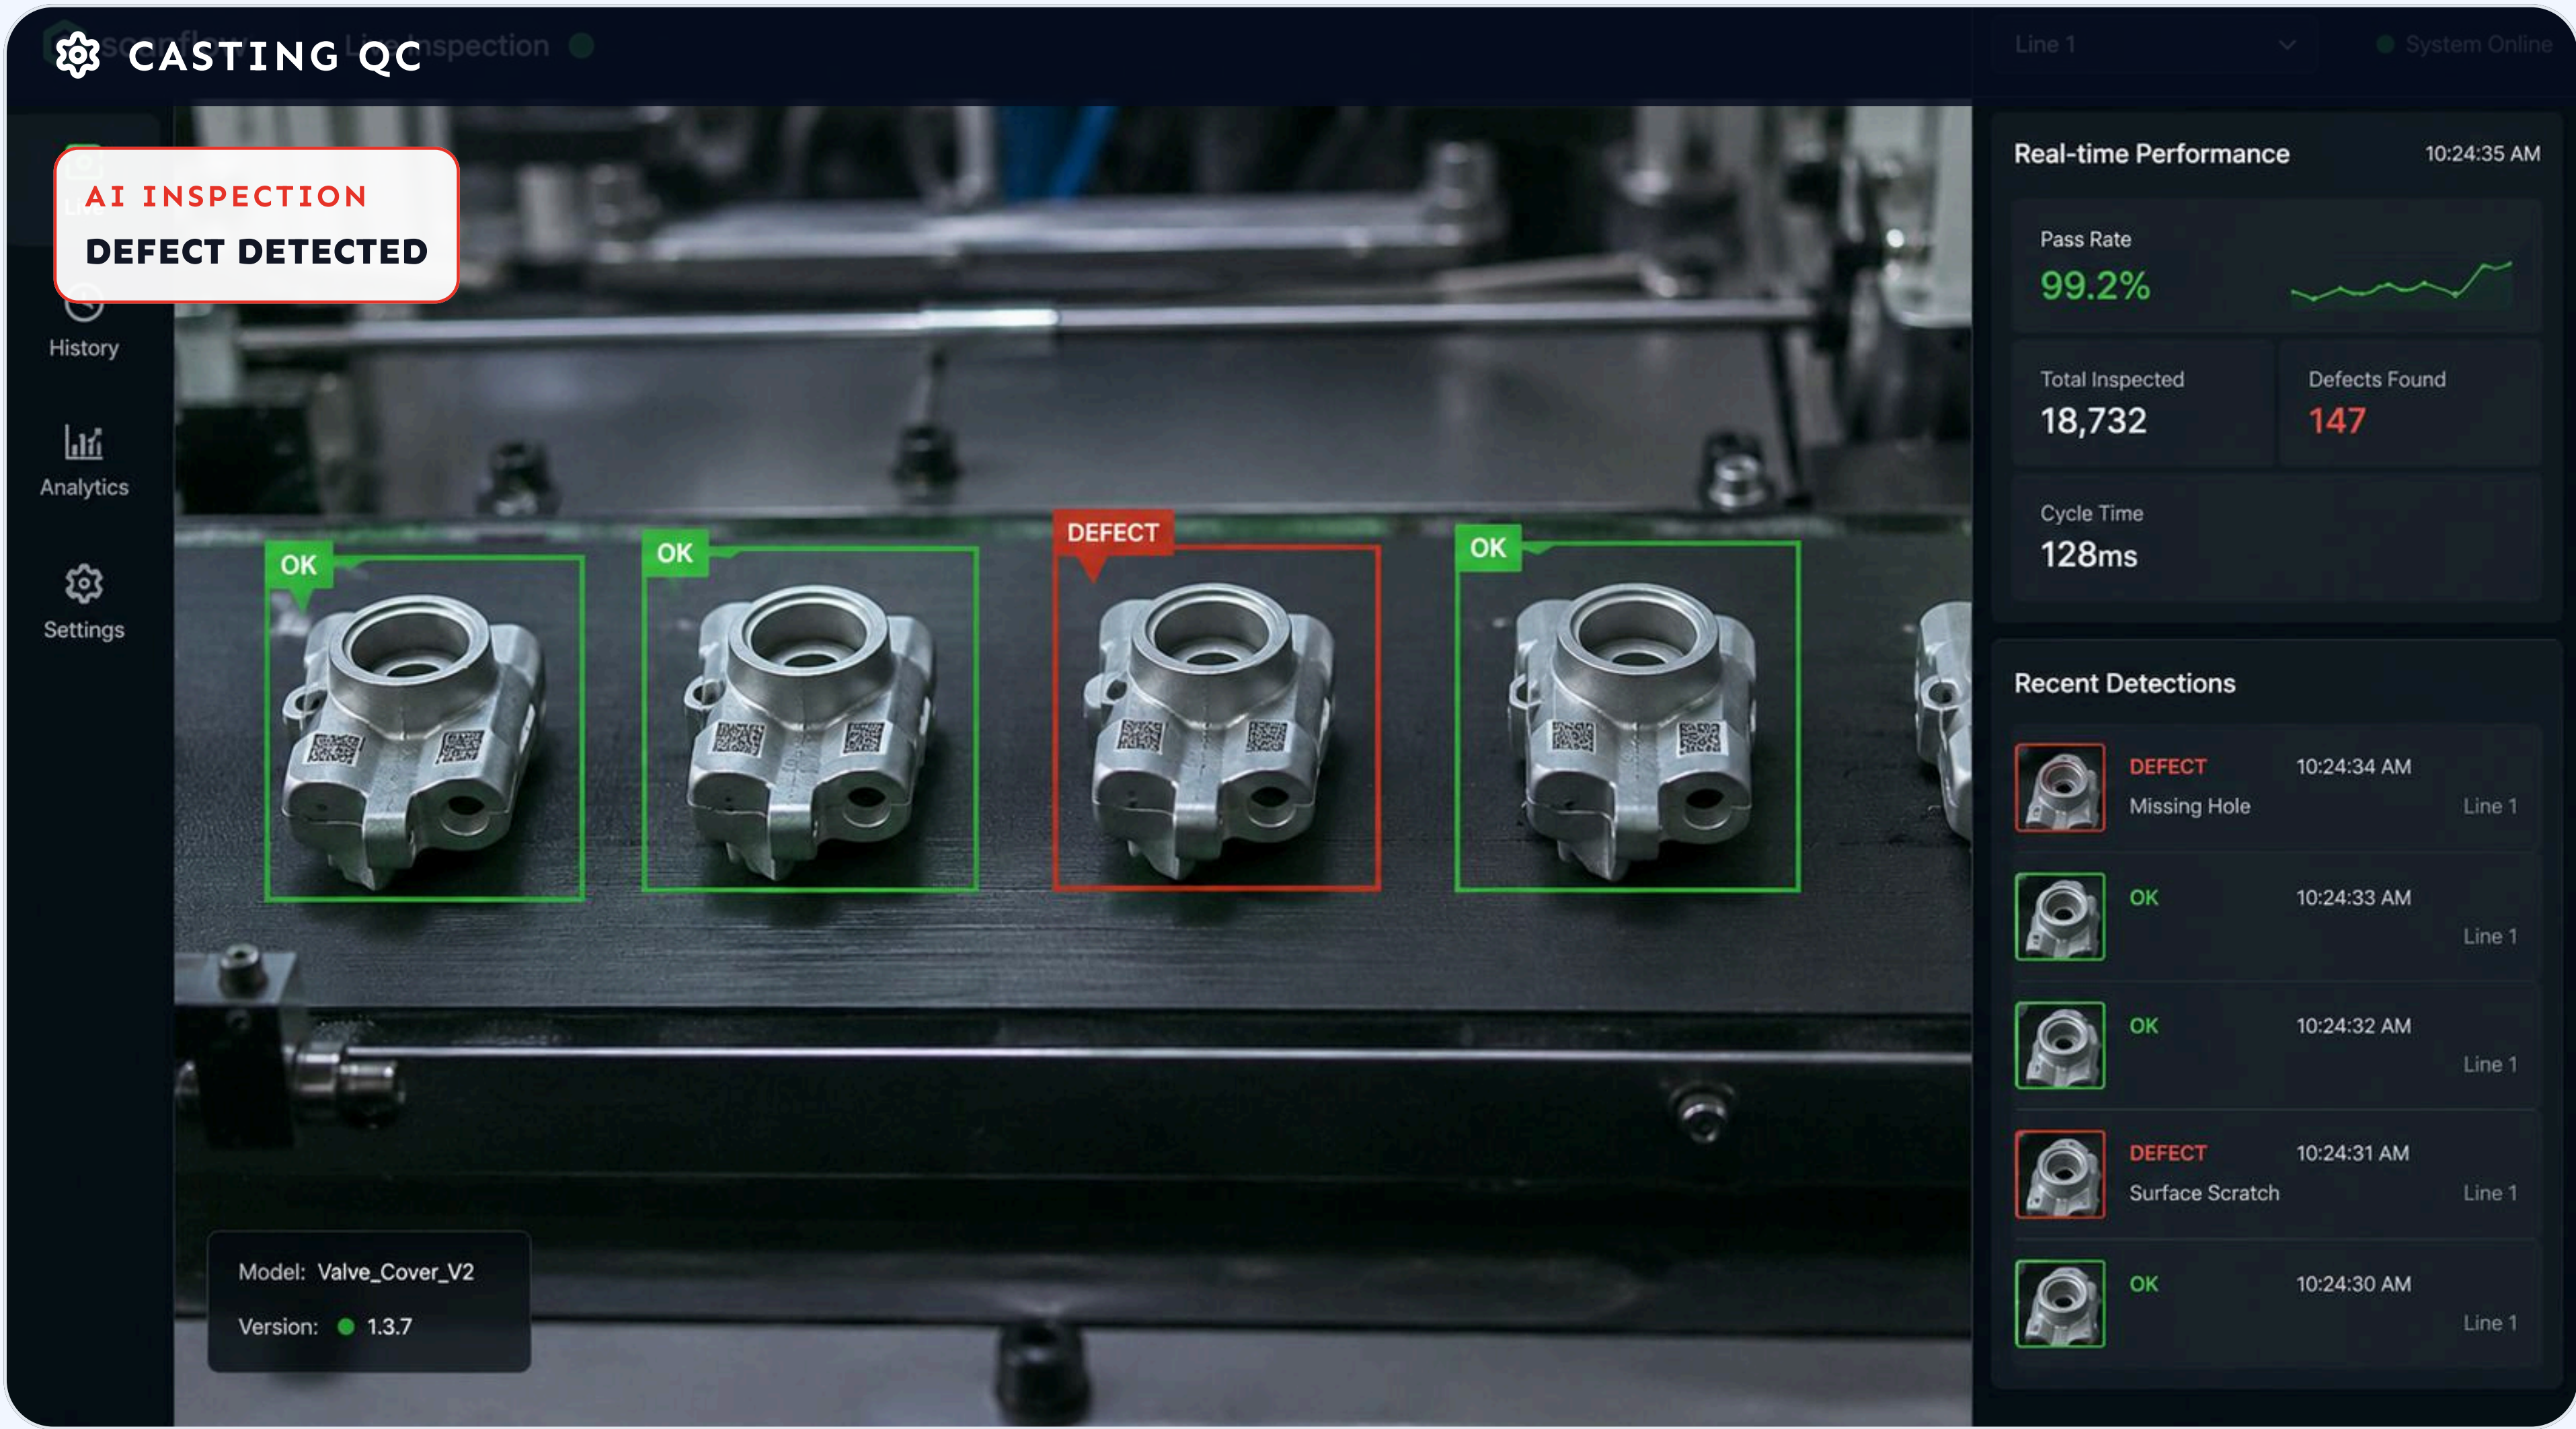

Data Annotation

Human-in-the-loop labeling that keeps detection models accurate as your parts evolve.

Agentic Workflow

Automated routing and follow-up actions once a defect is flagged no manual handoff.

Automated visual inspection of castings to detect defects in real time.

Ensure fastener quality with automated checks for dimensions and defects.

Asset Identification.

TRACK EVERY UNIT

Know what's moving, instantly.

VIN, barcode, and serial tracking built for fast-moving lines instant capture and verification, no manual logging.

- VIN scanning for vehicles and chassis, high accuracy, instant capture.
- Barcode & serial ID tracking across ITAD, solar, and tire assets.
- Full traceability from raw material to finished product.
- Works alongside Visual Inspection on the same platform no second system to manage.

MEET US AT OUR BOOTH -B125

Chennai Trade Centre, Nandambakkam

1 Watch AI Visual Intelligence in Action

Watch AI Visual Intelligence flag real defects on real components, live on screen.

2 Discuss Your Inspection stations

Talk to us about your tolerance checks and QC workflows for your line.

EXHIBITION BOOTH

Experience our next-gen system live

Meet our team, share your inspection challenges and see how Scanflow could work for your floor.
